

Clinical examination and Imaging in shoulder disease

M. N. Naderi

Fellowship in Shoulder surgery

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI**
- **Arthrogram**
- **Arthroscopy**

- **Common shoulder problems:**
 - Pain
 - Stiffness
 - Instability

- 1. **Rotator Cuff**
- 2. **Glenohumeral joint**
- 3. **Acromioclavicular joint**
- 4. **Clavicle**
- 5. **Neck**

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI**
- **Arthrogram**
- **Arthroscopy**

- **Common shoulder problems:**
 - Pain
 - Stiffness
 - Instability

When ?

How ?

Degree ?

Accompanying symptoms ?

Shoulder assessment

- *History*
- *Look , Feel*
- *Movement*
- *Clinical test*
- *Radiography*
- *Sonography*
- *Arthrography*
- *CT Scan*
- *MRI*
- *CT / MRI*
- *Arthrogram*
- *Arthroscopy*

- Asymmetry, scars, deltoid wasting, SCJ or ACJ deformity, swelling of the joint
- Look and feel for rotator cuff wasting, scapula shape and situation

Shoulder assessment

- History
- Look , Feel
- Movement
- Clinical test
- Radiography
- Sonography
- Arthrography
- CT Scan
- MRI
- CT / MRI
- Arthrogram
- Arthroscopy

- Always examine the Cervical spine first
- Move both arms at the same time
- Active then passive ROM
(FF , IR , ER)

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI**
- **Arthrogram**
- **Arthroscopy**
- Subacromial Impingement
- AC Joint
- Rotator cuff Integrity
 - Supraspinatus/anterosuperior cuff
 - Infraspinatus+teres minor/posterior cuff
 - Subscapularis/anteroinferior cuff
- Biceps
- Deltoid
- Serratus anterior
- Instability testing
 - Laxity tests
 - Stability test

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI**
- **Arthrogram**
- **Arthroscopy**

Subacromial Impingement

- **Hawkin's test**
- **Neer's sign & test**
- **Copeland Impingement Test**

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI**
- **Arthrogram**
- **Arthroscopy**

Subacromial Impingement

- **Hawkin's test**
- **Neer's sign & test**
- **Copeland Impingement Test**

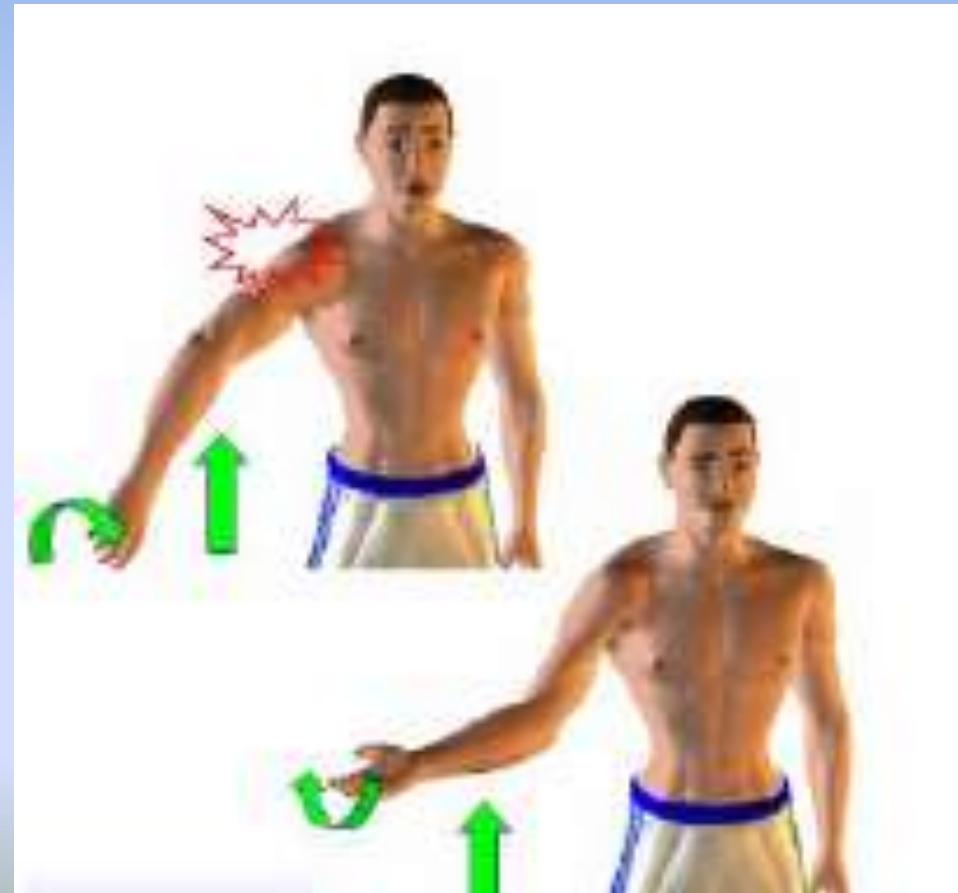

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI**
- **Arthrogram**
- **Arthroscopy**

Subacromial Impingement

- **Hawkin's test**
- **Neer's sign & test**
- **Copeland Impingement Test**

Shoulder assessment

- History
- Look , Feel
- Movement
- **Clinical test**
- Radiography
- Sonography
- Arthrography
- CT Scan
- MRI
- CT / MRI
- Arthrogram
- Arthroscopy

Subacromial Impingement

- Hawkin's test
- Neer's sign & test
- Copeland Impingement Test

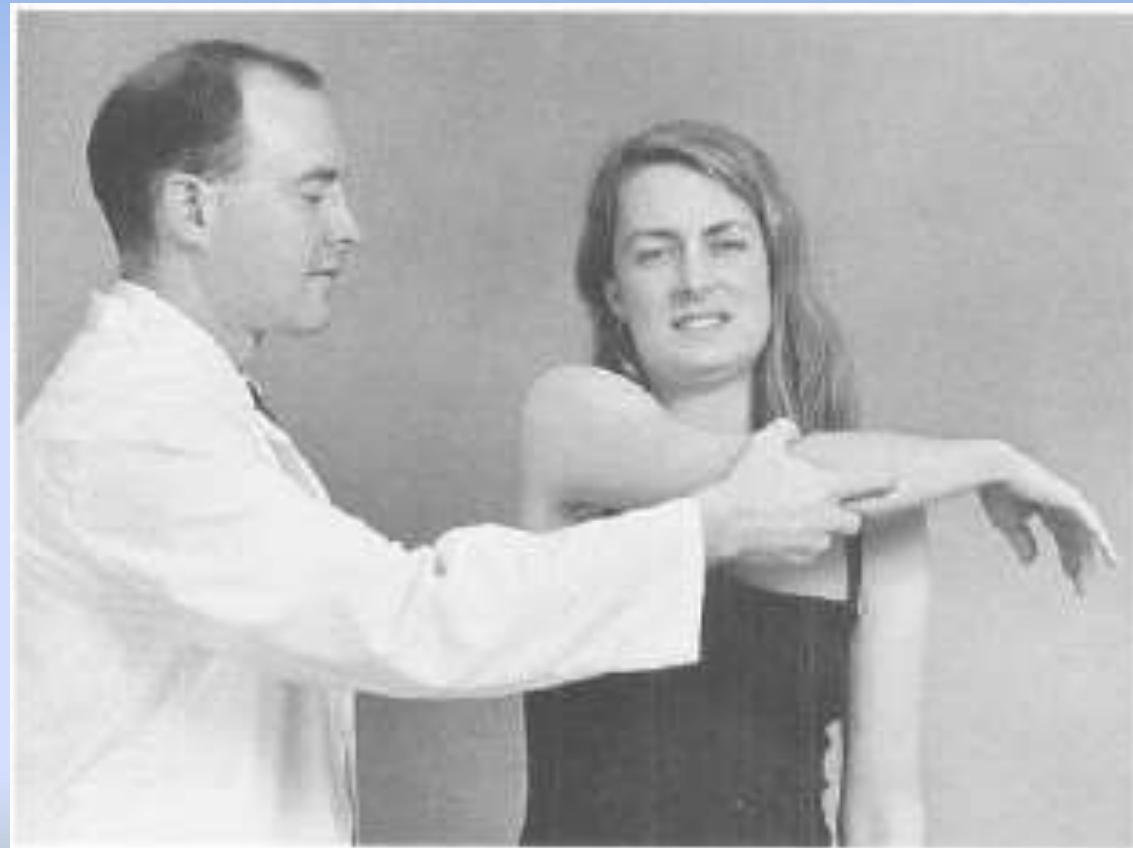

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI**
- **Arthrogram**
- **Arthroscopy**

AC Joint

- **Cross body adduction test (Scarf test)**

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI**
- **Arthrogram**
- **Arthroscopy**

Rotator cuff Integrity

- **Muscle resisting**
 - Jobe's empty can test
 - ER stress test (Resisted ER with the arms by side)
 - Lift-off test, Belly-Press test(Napoleon test)
- **Lag signs**
 - ER Lag sign
 - IR Lag sign
 - Drop sign

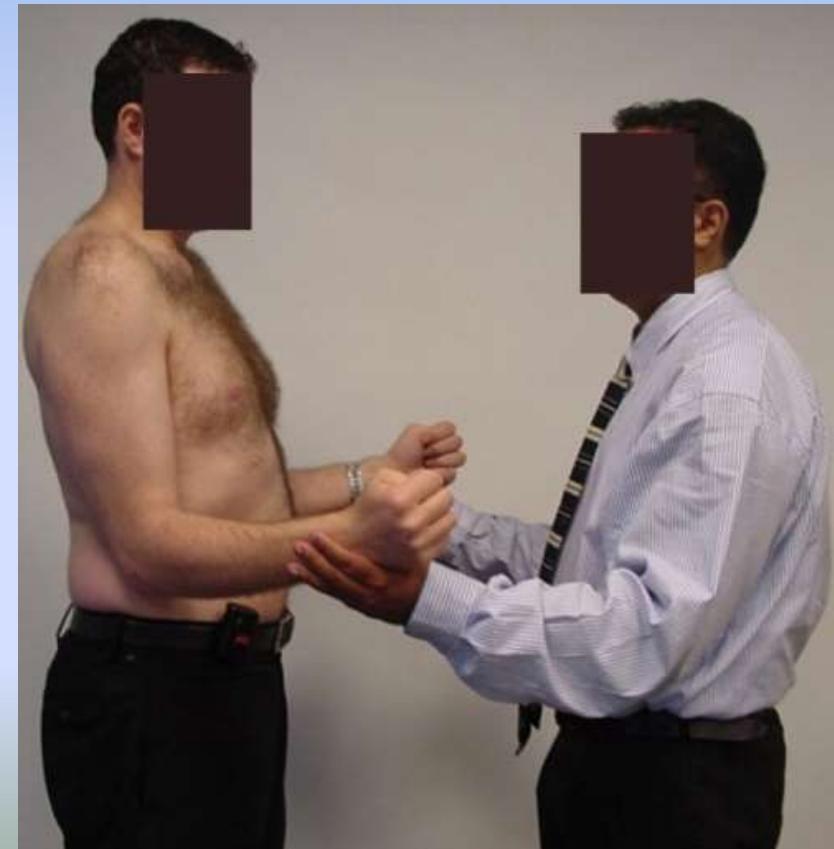

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI**
- **Arthrogram**
- **Arthroscopy**

Rotator cuff Integrity

- **Muscle resisting**
 - Jobe's empty can test
 - ER stress test (**Resisted ER with the arms by side**)
 - Lift-off test, Belly-Press test(**Napoleon test**)
- **Lag signs**
 - ER Lag sign
 - IR Lag sign
 - Drop sign

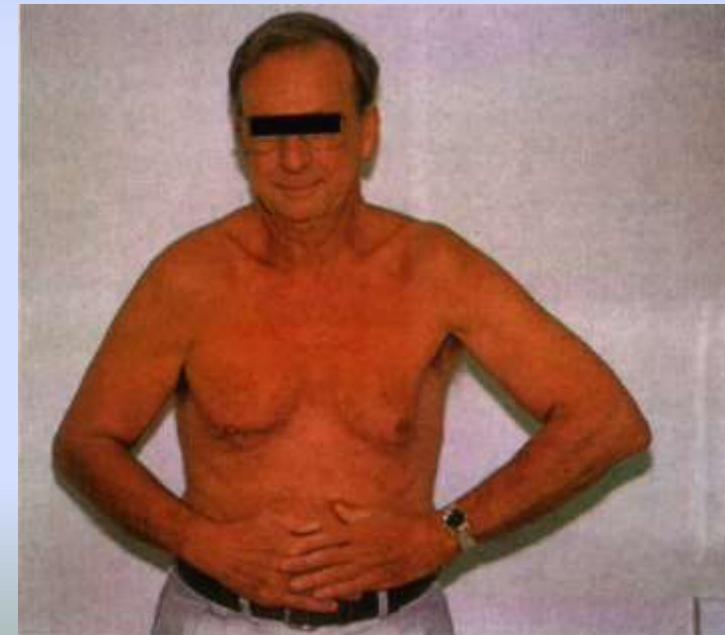

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI**
- **Arthrogram**
- **Arthroscopy**

Rotator cuff Integrity

- **Muscle resisting**
 - Jobe's empty can test
 - ER stress test (Resisted ER with the arms by side)
 - Lift-off test, Belly-Press test(Napoleon test)
- **Lag signs**
 - ER Lag sign
 - IR Lag sign
 - Drop sign

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI**
- **Arthrogram**
- **Arthroscopy**

Rotator cuff Integrity

- **Muscle resisting**
 - Jobe's empty can test
 - ER stress test (Resisted ER with the arms by side)
 - Lift-off test, Belly-Press test(Napoleon test)
- **Lag signs**
 - ER Lag sign
 - IR Lag sign
 - Drop sign

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI**
- **Arthrogram**
- **Arthroscopy**

Biceps

- **Speed's test**
- **Yergason's test**

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI**
- **Arthrogram**
- **Arthroscopy**

SLAP lesion

- O'Brien test (active compression test)

(O'Brien SJ, Pagnani MJ, Fealy S, McGlynn SR, Wilson JB. The active compression test: a new and effective test for diagnosing labral tears and acromioclavicular joint abnormality. Am J Sports Med. 1998 Sep-Oct;26(5):610-3.)

Shoulder assessment

- History
- Look , Feel
- Movement
- **Clinical test**
- Radiography
- Sonography
- Arthrography
- CT Scan
- MRI
- CT / MRI
- Arthrogram
- Arthroscopy

Park HB, Yokota A, Gill HS, et al: Diagnostic accuracy of clinical tests for the different degrees of subacromial impingement syndrome, J Bone Joint Surg 87A:1446, 2005.

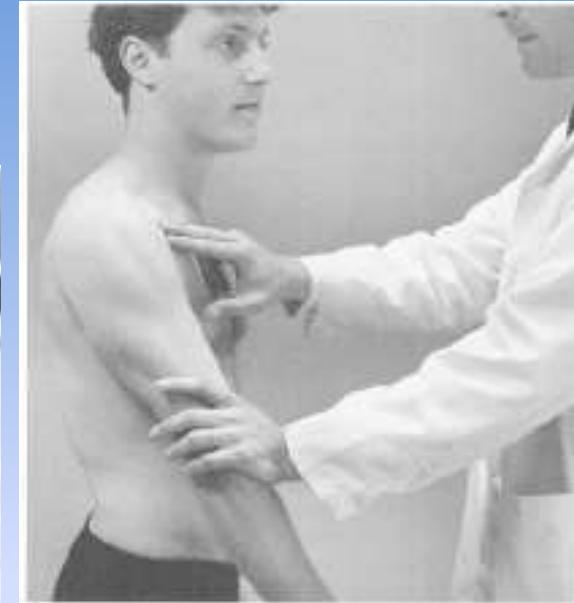

Clinical Tests for Subacromial Impingement (Regardless of Severity of Rotator Cuff Disease)

Test	Sensitivity (%)	Specificity (%)	Positive Predictive Value (%)	Negative Predictive Value (%)	Overall Accuracy (%)
Neer sign	68	68.7	80.4	53.2	68.3
Hawkins-Kennedy sign	71.5	66.3	79.7	55.7	69.7
Painful arc sign	73.5	81.1	88.2	61.5	76.1
Supraspinatus (Jobe) muscle test	44.1	89.5	88.4	46.8	60.2
Speed test	38.3	83.3	80.5	42.9	54.4
Cross-body adduction test	22.5	82	69.3	36.9	47.8
Drop-arm test	26.9	88.4	81	39.7	48.6
Infraspinatus muscle test	41.6	90.1	90.6	45.8	58.7

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI**
- **Arthrogram**
- **Arthroscopy**

Deltoid muscle

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI**
- **Arthrogram**
- **Arthroscopy**

Serratus anterior

- **Winging test**

Shoulder assessment

- *History*
- *Look , Feel*
- *Movement*
- **Clinical test**
- *Radiography*
- *Sonography*
- *Arthrography*
- *CT Scan*
- *MRI*
- *CT / MRI*
- *Arthrogram*
- *Arthroscopy*

- **Instability testing**
 - Laxity tests
 - Stability test

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI**
- **Arthrogram**
- **Arthroscopy**

Laxity Test

- **Sulcus sign**
- **Drawer Test**

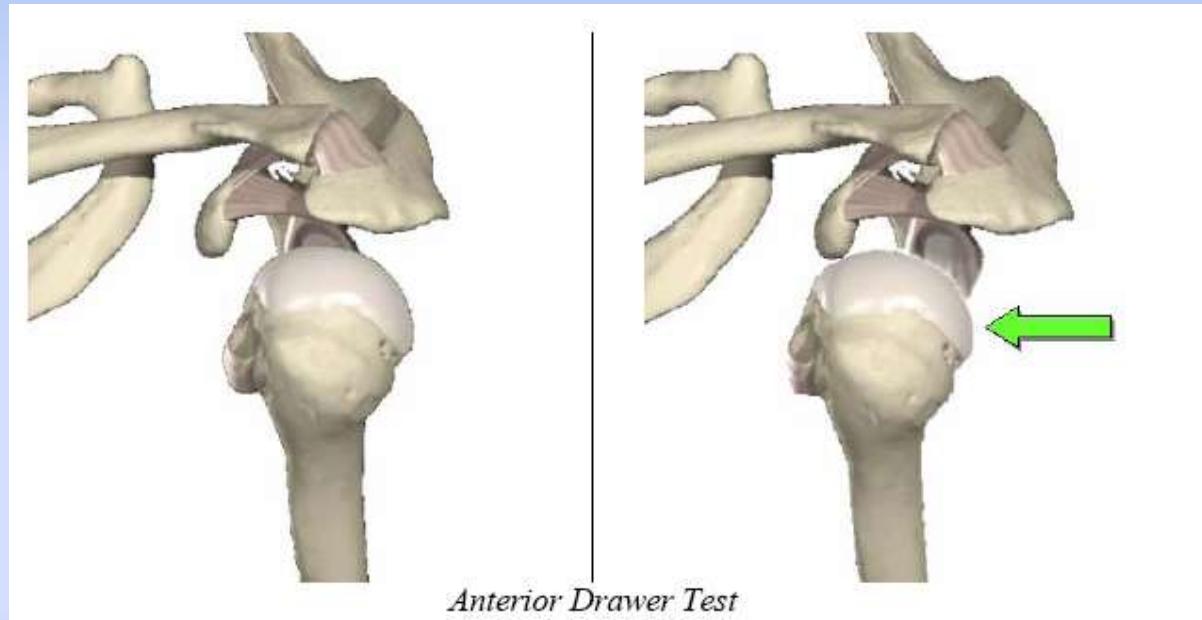

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI**
- **Arthrogram**
- **Arthroscopy**

Hawkins and Bokor :

<u>Laxity Grade</u>	<u>Description</u>
• Normal	Mild Translation (0-25%)
• Grade 1	Feeling of Head riding onto rim (25-50%)
• Grade 2	Head over rim, reduces spontaneously (>50%)
• Grade 3	Head over rim, remains dislocated

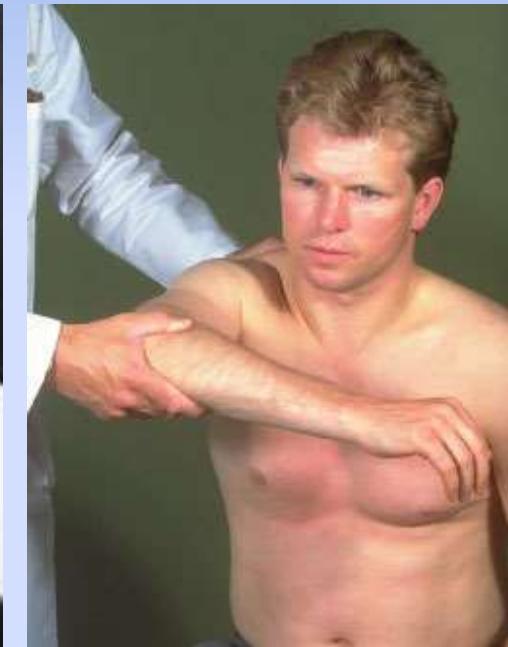

Hawkins RJ, Bokor DJ. Clinical evaluation of shoulder problems. In: Rockwood CA Jr, Matsen FA III, editors. The shoulder . 2nd ed, vol 1. Philadelphia: WB Saunders; 1998. p164 -97

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI**
- **Arthrogram**
- **Arthroscopy**

Stability Test

- **Apprehension Test**
 - Ant.
 - Post. (Jerk test)

Rowe CR, Zarins B. Recurrent transient subluxation of the shoulder. J Bone Joint Surg Am.1981; 63:863 -72.

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI**
- **Arthrogram**
- **Arthroscopy**

Stability Test

- **Relocation test (Jobe)**

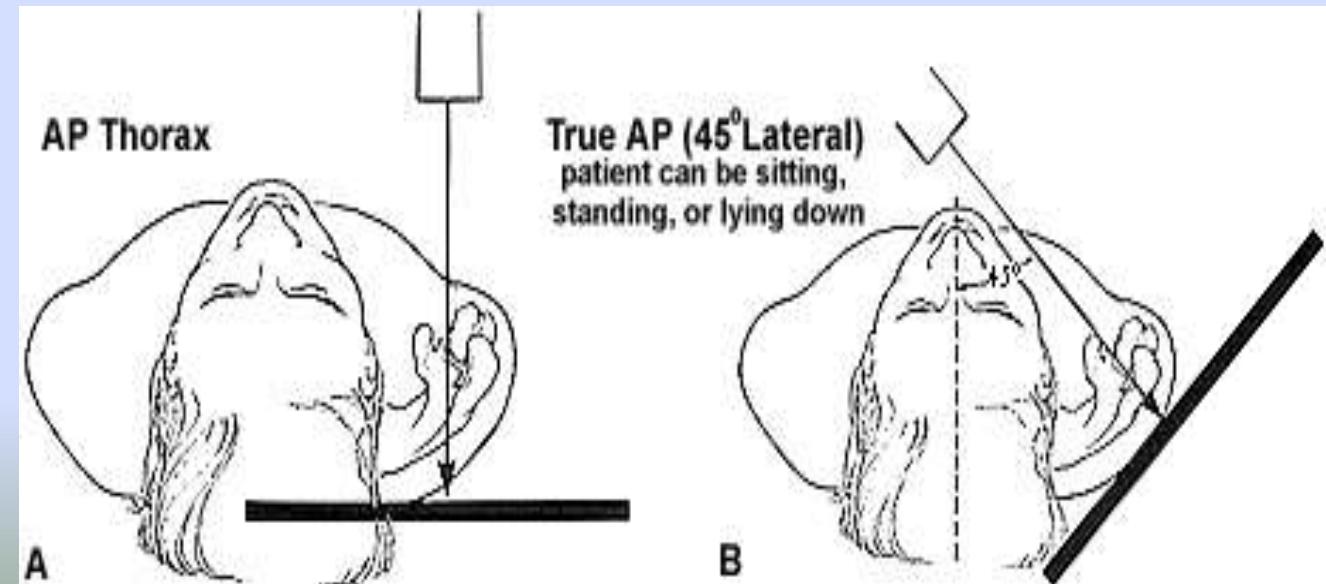

Jobe FW, Kvitne RS, Giangarra CE. Shoulder pain in the overhand or throwing athlete. The relationship of anterior instability and rotator cuff impingement. Orthop Rev.1989; 18: 963-75. Erratum in: Orthop Rev. 1989;18:1268.

Shoulder assessment

- History
- Look , Feel
- Movement
- Clinical test
- **Radiography**
- Sonography
- Arthrography
- CT Scan
- MRI
- CT / MRI
- Arthrogram
- Arthroscopy

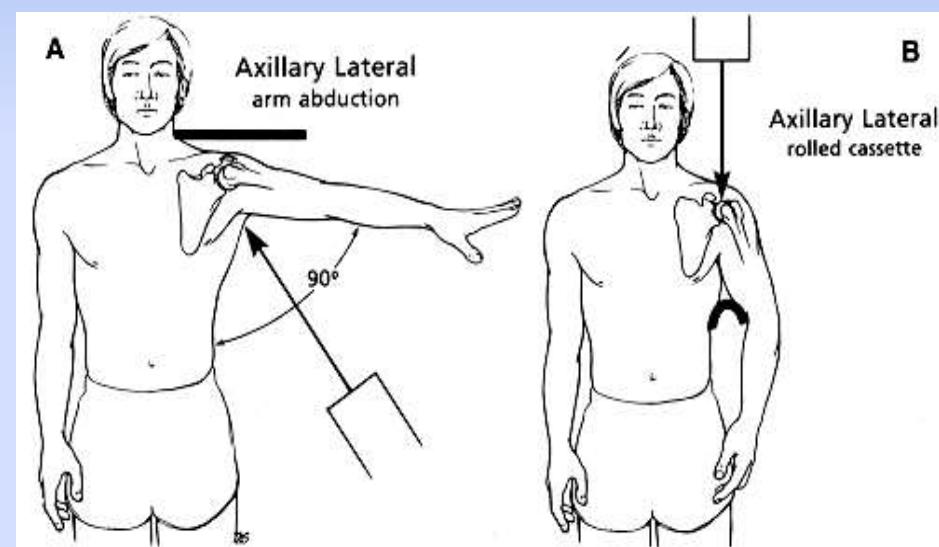

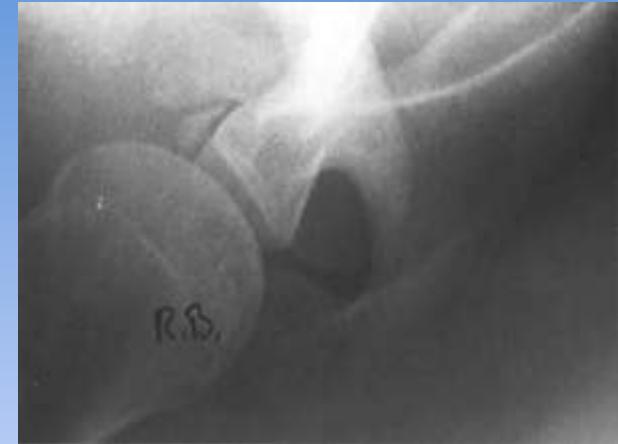

- AP
- Axillary view
- Lat scapular view

Shoulder assessment

- History
- Look , Feel
- Movement
- Clinical test
- **Radiography**
- Sonography
- Arthrography
- CT Scan
- MRI
- CT / MRI
- Arthrogram
- Arthroscopy

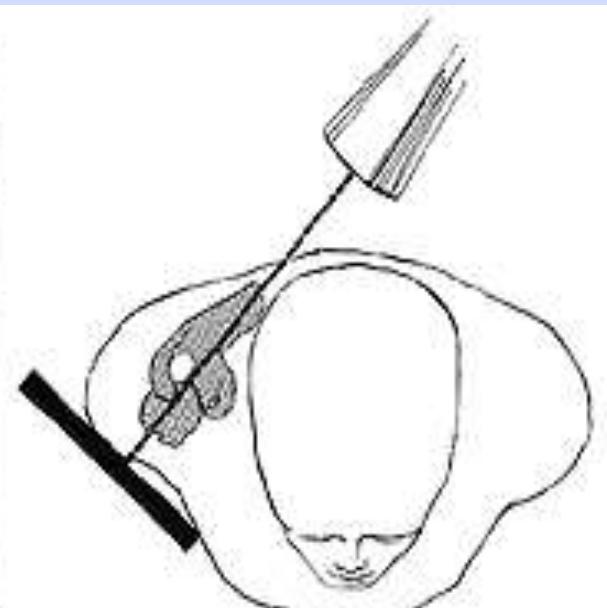

- AP
- Axillary view
- Lat scapular view

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI**
- **Arthrogram**
- **Arthroscopy**

- **AP**
- **Axillary view**
- **Lat scapular view**

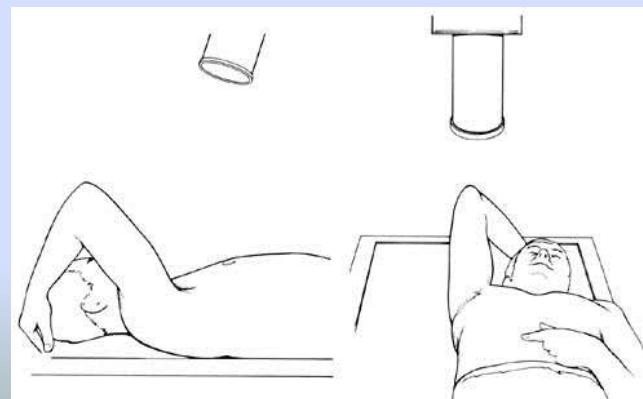

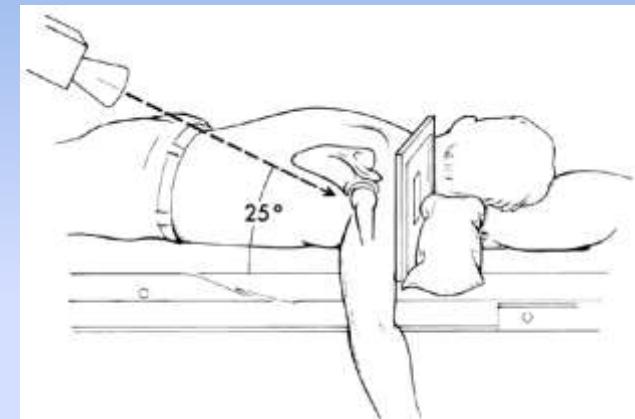

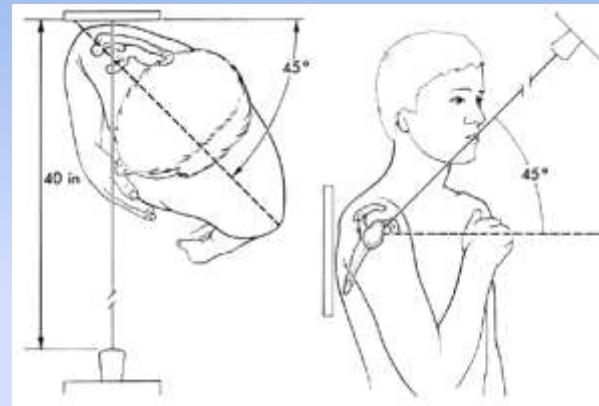

Shoulder assessment

- History
- Look , Feel
- Movement
- Clinical test
- **Radiography**
- Sonography
- Arthrography
- CT Scan
- MRI
- CT / MRI
- Arthrogram
- Arthroscopy

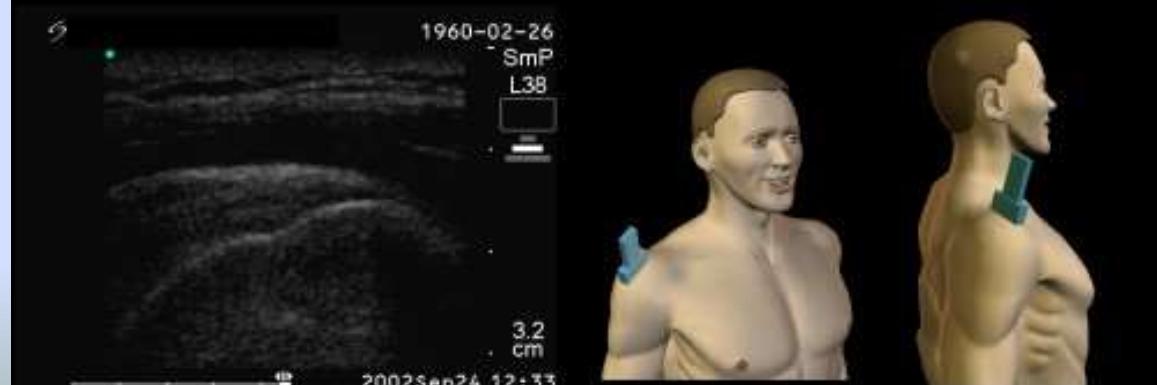

- **Specialized views**

- apical oblique view
- West Point view
- Stryker notch view

Shoulder assessment

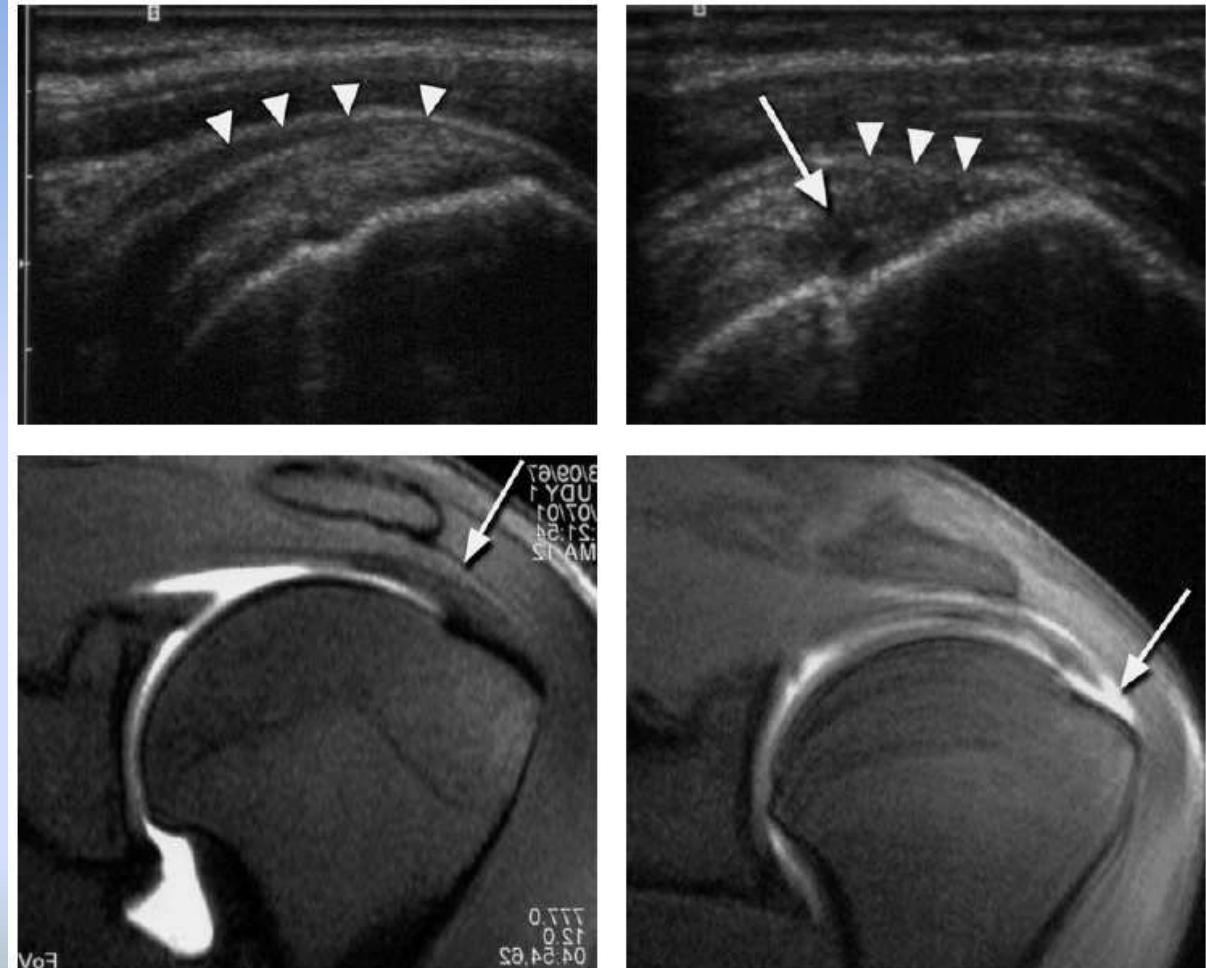

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI**
- **Arthrogram**
- **Arthroscopy**

Shoulder assessment

- History
- Look , Feel
- Movement
- Clinical test
- Radiography
- **Sonography**
- Arthrography
- CT Scan
- MRI
- CT / MRI
- Arthrogram
- Arthroscopy

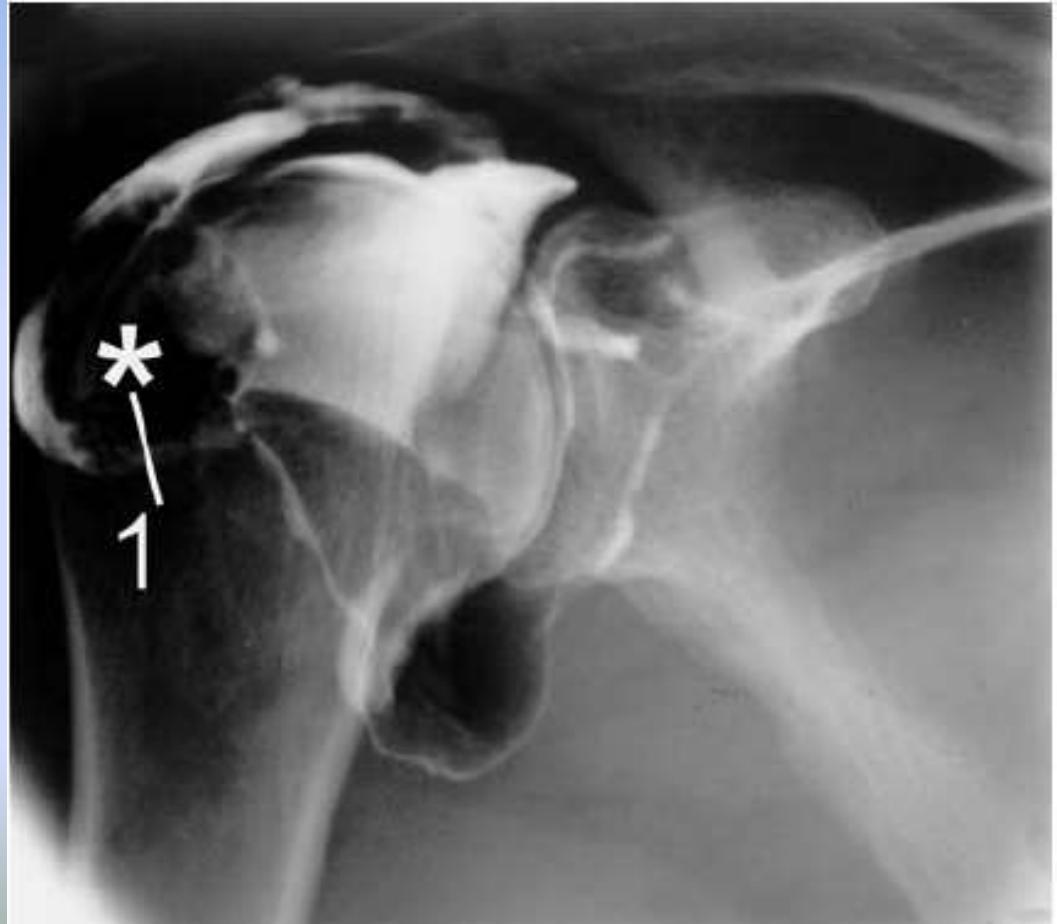

- Reliable & fast method for evaluation of cuff
- Dependent to operator experience

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI**
- **Arthrogram**
- **Arthroscopy**

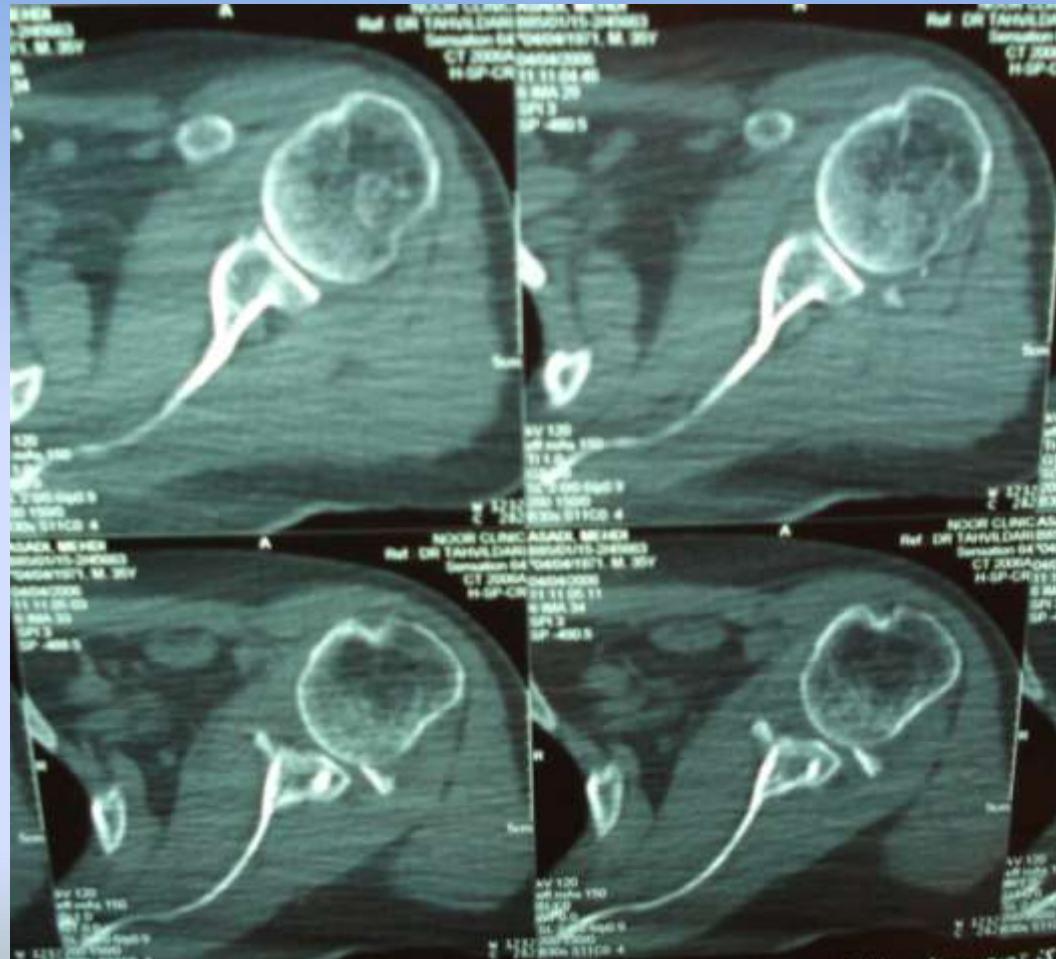

- High value in diagnosis of complete cuff tear
- limited in assess of size and morphology of tear

Shoulder assessment

- History
- Look , Feel
- Movement
- Clinical test
- Radiography
- Sonography
- Arthrography
- **CT Scan**
- MRI
- CT / MRI
- Arthrogram
- Arthroscopy

- Best Diagnostic imaging modality for assessment of bony lesion (glenoid ,,,)

Shoulder assessment

- History
- Look , Feel
- Movement
- Clinical test
- Radiography
- Sonography
- Arthrography
- CT Scan
- MRI
- CT / MRI
- Arthrogram
- Arthroscopy

- Three dimensional CT (3D CT)

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI**
- **Arthrogram**
- **Arthroscopy**

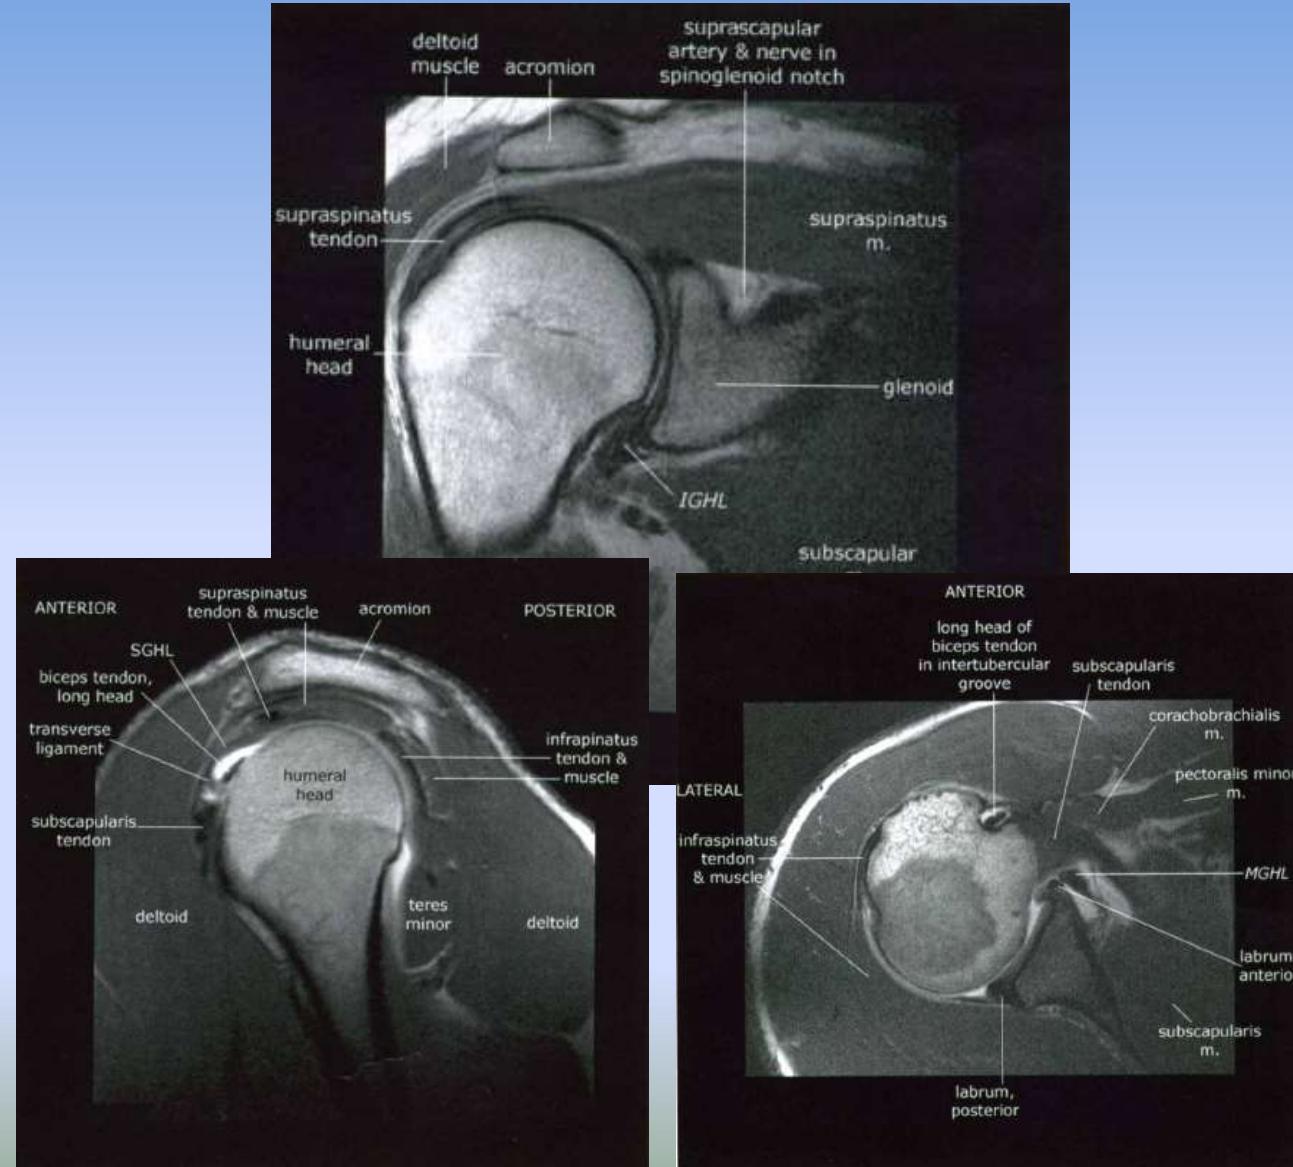

TABLE 1.1 APPEARANCES OF TISSUES ON MR IMAGES

Tissue	T1-weighted Image	T2-weighted Image
Fat ^a	Very bright	Intermediate to dark
Cysts		
Water	Very dark	Very bright
Proteinaceous	Intermediate to bright	Very bright
Bone marrow		
Yellow ^a	Very bright	Intermediate to dark
Red ^b	Intermediate	Dark
Cortical bone	Very dark	Very dark
Cartilage		
Fibrocartilage	Very dark	Very dark
Hyaline ^c	Intermediate	Intermediate
Osteophyte		
Marrow	Bright	Intermediate to dark
Calcified	Dark	Dark
Tendons	Dark	Dark
Ligaments	Dark	Dark
Muscle	Dark	Dark
Gadolinium enhancement		
Low concentration	Very bright	Bright
High concentration	Intermediate to dark	Very dark

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI Arthrogram**
- **Arthroscopy**

Assessment for the soft tissue lesions (labral lesion, rotator cuff , Slap lesion)

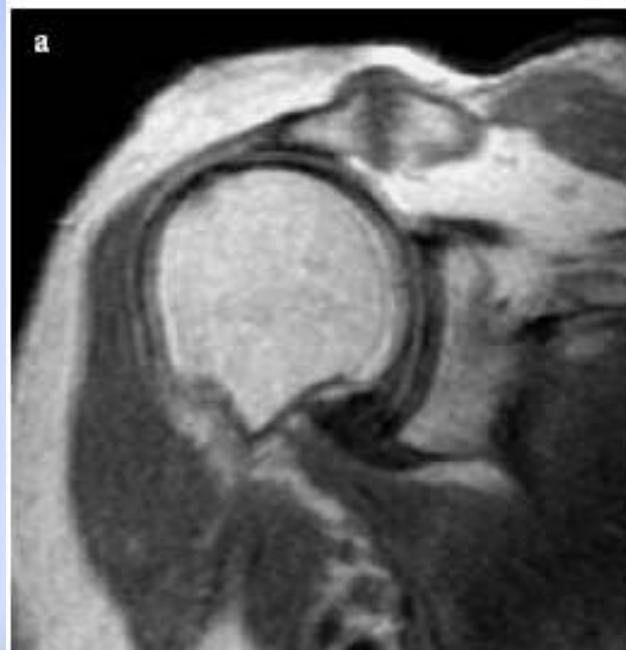

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI**
- **Arthrogram**
- **Arthroscopy**

Muscle Quality

- Stage 0 normal, Ø Fat
- Stage 1 minimal Fatty infiltration
- Stage 2 Muscle > Fat
- Stage 3 Muscle = Fat
- Stage 4 Muscle< Fat

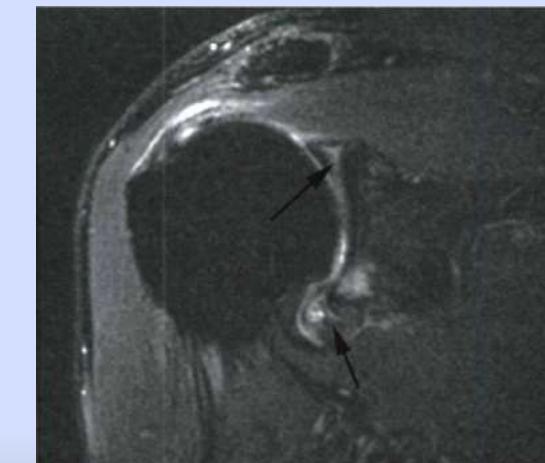

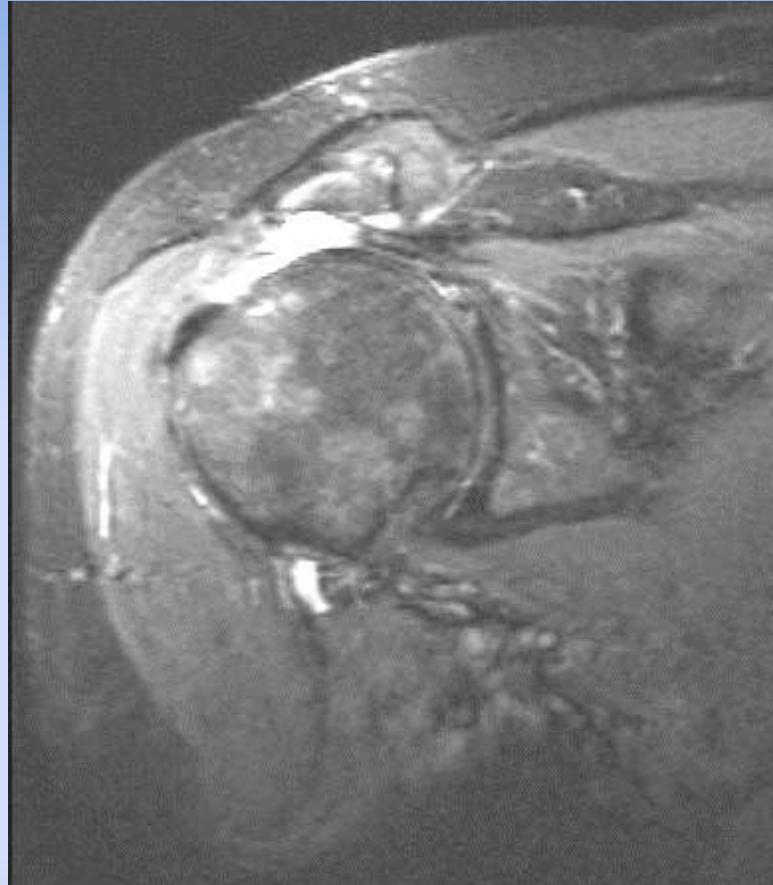

The presence and degree of fatty infiltration and atrophy of the muscle affect the success of the repair

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI Arthrogram**
- **Arthroscopy**

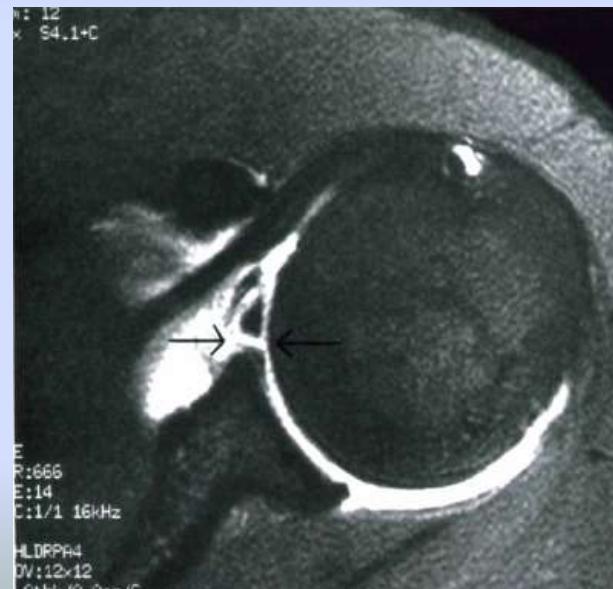

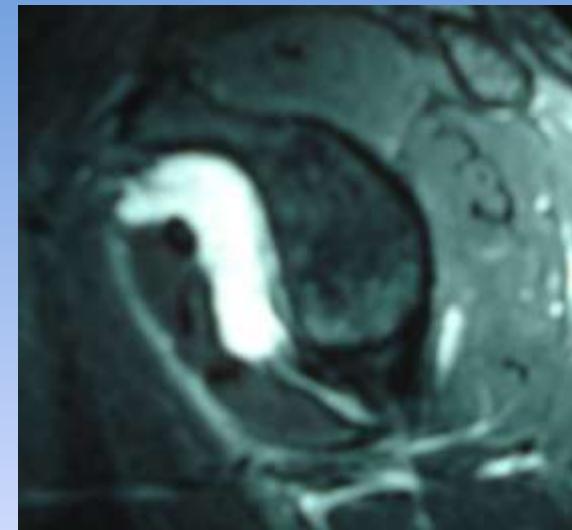

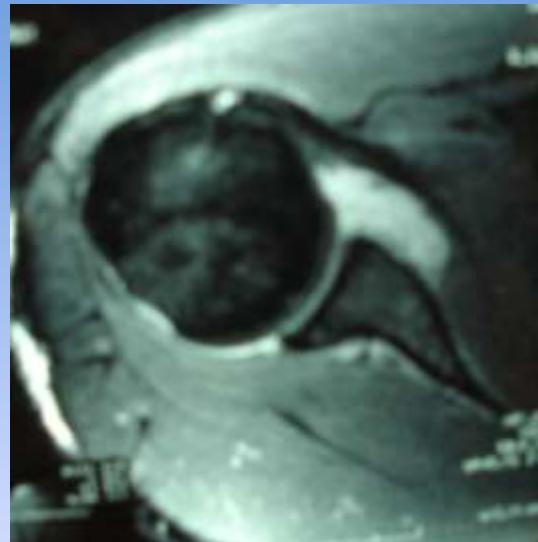

- most commonly used test for evaluation for RC pathology
- significant potential for false-positive findings
- overuse

Shoulder assessment

- History
- Look , Feel
- Movement
- Clinical test
- Radiography
- Sonography
- Arthrography
- CT Scan
- MRI
- **CT / MRI
Arthrogram**
- Arthroscopy

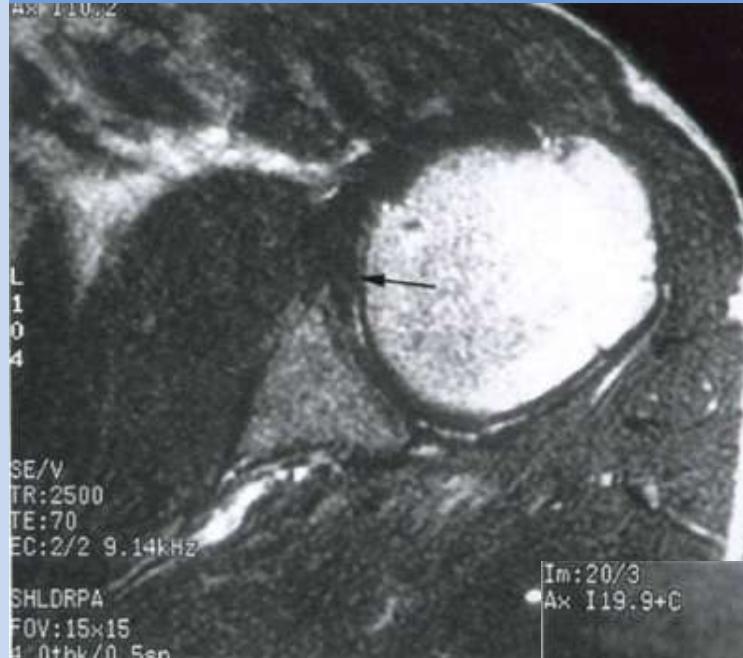

MRI Arthrogram: Improve the assessment of intraarticular structures, including the glenoid labrum GHL & capsule

Shoulder assessment

- History
- Look , Feel
- Movement
- Clinical test
- Radiography
- Sonography
- Arthrography
- CT Scan
- MRI
- **CT / MRI
Arthrogram**
- Arthroscopy

MRI

MRI Arthrogram

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI
Arthrogram**
- **Arthroscopy**

In a study on 30 patients: A labral tear was detected on MR images in 93%, on MR arthrograms in 96%, and on CT arthrograms in 73%.

Chandnani Vp, et al. Glenoid labral tears: prospective evaluation with MR imaging, MR arthrography and CT arthrography. *AJR* 1993;161:1229.

Shoulder assessment

- **History**
- **Look , Feel**
- **Movement**
- **Clinical test**
- **Radiography**
- **Sonography**
- **Arthrography**
- **CT Scan**
- **MRI**
- **CT / MRI**
- Arthrogram**
- **Arthroscopy**
